

VeriFone

Product Mounts

SpacePole® pin pad mounts are available as a tilting or pole mount. Both versions have a plastic flange cover, internal cable management, a footprint of Ø97mm and are finished in black (RAL9005). Other mounting options, colours, pole heights and terminal plates are available on request. The mountings have the flexibility to be:

- Adjustable: the angle of display and keypad entry surface can be forward tilted 10°-70°
- Detachable: the terminal can be lifted off the plate, particularly for disabled customers
- Rotational: the mounts rotate 210° (side to side or back to front) for easy reach
- Secure: the terminal can be fitted with a privacy shield for pin number entry and secure fittings discourage theft.

Warranty: 5 years on all metal parts.
Patents pending: PCT/DK03/00433 and PA 2003 01658.
